DETAILED ACTION

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-4, 8-12, 15 and 16 are rejected under 35 U.S.C. 103(a) as being unpatentable over Weisman, II et al..

The patent to Weisman, II et al discloses an engine control module 20 that is a computer with microprocessor 24 and Rom 28 and Ram 26 to record data and output it to user interface 34 at the present time or a later time. The controller 20 controls fuel supply by controlling injectors 40 and the sensors 42 include speed sensors. The speed is recorded in a time series manner to optimize fuel supply. All optimization sequences need to record over time in order to achieve their optimization as described in the abstract. The optimization is disclosed in columns 7 and 8. The user interface data hub 34 is described in column 4 and can be accessed by the user at their time of choosing and therefor a connection state obviously has to be changed to access the data. This could obviously be as simple as turning the device on or off as it is necessary to retrieve the stored data. In regard to claim 1, that the examiner had concluded defined over Weisman under 35 USC 102 in the interview, a rejection is now made under 103. It would be obvious that recording the speed of the vehicle stops when the vehicle stops, as the vehicle could obviously be turned off in order to save fuel.

Claims 5-7 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claims 13 and 14 are allowed.

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
